an outer textile casing formed of a tough, chew-resistant material defining a shape in the form of a small article for lure or being fetched by the domestic animal and comprising a high-pile component attached to a backing material to form an artificial fleece, the material formed in two layers sewn together at the edges with the high-pile component outwardly; and an effective amount of a microbe-cidal agent applied to the textile casing, wherein the microbe-cidal agent is non-toxic and non-carcinogenic when ingested by domestic animals at the levels used in the amusement article.

Kindly add the following new claims 59-65 as follows:

59. (New) A textile-based amusement article according to claim 56 wherein the microbe-cidal agent is non-toxic and non-carcinogenic when ingested by domestic animals at the levels used in the amusement article.

SJW 3
R3

3 60. (New) A textile-based amusement article according to claim 45 wherein the outer textile fabric is treated with a compound to impart at least one of low surface energy, non-hydrophilic properties, antistatic properties and antiadhesion properties.

A
R3

4 61. (New) A textile-based amusement article according to claim 45 wherein the outer textile casing comprises an outer fabric layer and the microbe-inhibiting agent or property comprises a microbe-impenetrable laminate on an inner surface of the outer fabric layer.

5 62. (New) A textile-based amusement article according to claim 61 wherein the microbe-impenetrable laminate comprises a thermoplastic film or latex polymer.

6 63. (New) A textile-based amusement article according to claim 62 wherein the microbe-cidal agent is applied to or incorporated into the thermoplastic film or latex polymer.
